

**VEHICLE SET OF 3 SOLAR / SUN SCREENS**  
**thermal insulation for cold & hot weather**

**BEFORE INSTALLATION:**

Place the suction cups in a bowl with 80-85 degrees hot water and leave them in the water for 15 minutes.

This will make sure that the suction cups re-shaping into original form BEFORE you install them on the screens.

**INSTRUCTION FOR USE:**

To attach each screen and fasten them to the window/ windscreen- bring each screen close to the glass and then press the suction cups on.

To take the screens off; pull the suction cups off one by one starting from any side. Absolutely avoid to pull too much, forcefully and fast as otherwise you will get torn and may damage the screen after a few uses.

Hint; help with your free hand and support from the other side to loose the suction cups from the glass.

A clean glass will make the suction cups even working better- so have some glass cleaner on board!

Large window screens:

Its also a good idea that after the screen is attached to fold down the sun-visor to support the screen even better.
